

Long-term Storage of Rigid Contact Lenses

Your previously worn rigid contact lenses can be safely stored for later use in urgent situations by following these instructions:

1. Clean the lenses using your normal daily cleaning regimen.
2. Rinse the lenses thoroughly using cool tap water.
3. *Gently* blot the lenses dry using a plain facial tissue.
(Do not use tissues that contain moisturizing additives.)
4. Store the lenses **dry** in a clean & dry lens case.
