

Chris Mullin
Tennis Professional
DGS class of 2005

“You know the adage ‘seeing is believing?’ I have to admit I was skeptical when Dr. Prasnika discussed orthokeratology for my son. He was on the tennis team. I was always concerned about the additional injury that his contacts or glasses might cause. He was concerned about the hassle of contacts and glasses.

It has been remarkable! Chris continues to have perfect daytime vision without the hassle of daytime contacts or glasses.”

Barb Mullin

Dr. Anthony J. Prasnika is the Clinical Director of the Eyecare Center Of DuPage, Ltd. in Westmont, IL and founder of the OrthoK Center of Excellence. He earned his Doctorate Degree from the Illinois College of Optometry in Chicago and is an accomplished orthokeratologist. He is a

Certified WAVE Contact Lens Designer and Night Lens Premier Provider. He is a member of the American Academy of Orthokeratology and Myopia Control, the Illinois Optometric Association and the American Optometric Association.

Victory and Vision go hand-in-hand.

But *how* you see can get in the way.

Glasses slip, fall, fog, glare, distort perspective & limit peripheral vision.

Contact lenses dislodge, fall out, dry, burn & blur.

Is there a better way?

Introducing orthoK . . . the better way.

OrthoK, formally known as orthokeratology, is a highly effective non-surgical vision shaping system. We call it the *Gentle Vision Shaping System*.

OrthoK eliminates the need to wear glasses or contacts during waking hours.

How does it work? Special retainer contact lenses are designed using eye print imaging of the cornea, something like a fingerprint for the eye. Worn only during sleep, the vision retainers gently and safely reshape the cornea into a corrected shape. This eliminates the need for glasses or contacts during waking hours. As an added benefit,

orthoK has been shown to slow, and in some cases completely halt, the rapid worsening of myopia (nearsightedness.)

In as little as one night you can enjoy crisp, clear, comfortable vision and peak performance during all your activities.

Gentle and completely reversible, orthoK is safe for patients of all ages, even children.

With the *Gentle Vision Shaping System* you can stop worrying about your glasses & contacts, and concentrate on winning the game. It's the better way to play.

Eyecare Center  Of DuPage, Ltd.

Introducing

Our patients must succeed. Therefore, we are committed to practicing orthokeratology at a very high level. The orthoK Center of Excellence was created within the Eyecare Center Of Dupage as an outgrowth of that commitment. With a focus on training, technology & technique we have created an environment focused on your success.
